SUMMARY

Through a Machine Learning internship, I seek to expand my knowledge of data analysis, predictive modeling, and intelligent systems. My objective is to apply my analytical thinking, problem-solving abilities, and understanding of data-driven concepts to real-world challenges. I am eager to contribute to innovative projects while continuously learning advanced machine learning techniques and improving my technical skills in the field of Computer Science.

EDUCATION

Oct 2023 - Jul 2027

Bachelor in Computer Science

University of Management and Technology

- Current CGPA: 3.83
- SGPA: 3.84

Intermediate (ICS)

Punjab Group Of Colleges

2021- 2023

Matric

The Educators High School

2019-2021

TECHNICAL PROJECTS

Survox – Online Survey Platform (PHP, MySQL, HTML/CSS/JavaScript)

Developed a full-stack online survey platform that enables users to create, manage, and submit custom surveys. Implemented user authentication and designed a MySQL database to securely store survey data and responses.

Hotel Management System (C++, Data Structures)

Built a hotel management system using C++ and data structures concepts. The system includes an admin panel for managing room details and a customer interface for real-time room availability and booking management.

Hangman Game (C++)

Developed a terminal-based Hangman game in C++ using loops, conditional statements, and string manipulation. Implemented game logic to track guesses, incorrect attempts, and win/loss conditions dynamically.

ADDITIONAL INFORMATION

Technical Skills:

- Programming in C++, Python
- Core Computer Science: Object-Oriented Programming (OOP), Data Structures & Algorithms, Operating Systems, Computer Architecture, Database Systems, Theory of automata
- Data & Analytics: Data Mining
- Front-end: HTML, CSS, Bootstrap, Javascript, Tailwind css
- Backend: MySQL
- Office: MS Word, Excel, PowerPoint
- Basics of Machine learning

Languages:

- English, Urdu, Punjabi
